Protection of first-aiders : During rescue operations, wear protective equipment (see "8. Exposure control/personal protection").

5. FIREFIGHTING MEASURES

Suitable extinguishing media : Dry chemical powder
Regular foam
Carbon dioxide
Dry sand

Unsuitable extinguishing media : Straight streams

Specific hazards during firefighting : Cool cylinders/containers with an appropriate cooling means, paying heed to incompatible hazardous substances (see "10. Stability and reactivity").
The combustion gas may contain an irritating, corrosive and/or toxic gas.
Harmful gases (see "10. Stability and reactivity") and metal oxide fumes may be released by fire and may cause dizziness, suffocation, or other health hazards.
Heating may cause cylinders/containers to explode or to rocket.

Specific extinguishing methods : Evacuate immediately before the cylinder/container temperature higher than their rupture risk level.
Keep upwind.
Fight fire from a protected location.
Keep unauthorized personnel away.
In case of a large fire and large quantities: Evacuate the area and extinguish the fire from a distance in accordance with the risk of explosion.
Protecting other nearby combustibles before they catch fire:
Remove cylinders/containers or sprinkle them with water, etc., if this can be done safely.
Protecting the product from external fire: Remove product-containing cylinders/containers to a safe place, or cool the nearby equipment with water, etc., if this can be done safely.
If the fire cannot be stopped, let it burn itself out while cooling with water spray to prevent the fire from spreading.
Confining and smothering fire is preferable.
Stop leak if possible without any risk.
Dike fire water for later disposal; do not spread the material.
Cool containers with flooding quantities of water until well after fire is out.

Special protective equipment for firefighters : Wear regional, national, and local standards approved fire fighting turnout gear and positive pressure self-contained breathing apparatus (SCBA).
Wear flame-resistant or fireproof clothes, with face shield, helmet and gloves.

6. ACCIDENTAL RELEASE MEASURES

- Personal precautions, protective equipment and emergency procedures : Personal precautions
Use personal protection recommended in "8. Exposure control/personal protection".
Wear appropriate protective equipment (see "8. Exposure control/personal protection") to avoid contact of droplets with the skin, or inhalation of mist or vapors.
Emergency procedures
Evacuate people who are downwind, and keep upwind while working.
Keep unauthorized personnel away.
If the surrounding area may be affected (including health impairment), warn the nearby residents.
Remove immediately all ignition sources nearby.
Form large safety zone.
Prevention of secondary hazards
ELIMINATE all ignition sources such as heat/sparks/open flames/hot surfaces/static discharges.
Prepare appropriate extinguishing agent. (See "5. Fire-fighting measures")
- Environmental precautions : Avoid release to the environment.
- Methods and materials for containment and cleaning up : Collect the leakage promptly.
Stop leak if possible without any risk.
Dike far ahead of liquid spill for later disposal.
Absorb remaining liquid in dry earth, sand or other non-combustible material and remove to safe place.
Use explosion-proof electrical/ventilating/lighting/equipment.
ELIMINATE all ignition sources such as heat/sparks/open flames/hot surfaces/static discharges.
Consult with an expert when collecting the leakage.
Collect leakage after taking measures for safe handling (see "7. Handling and storage").
See "13. Disposal considerations".

7. HANDLING AND STORAGE
